

## Eurovema Mobility AB

Eurovema Mobility AB develops, manufactures and markets technical aids. We work with our own brands Euroflex (work chairs and electric-powered indoor wheelchairs), Alvema (children's products and stroller) and Volaris (rollators).

The products are made in our factory in Gislaved, Sweden. Our business concept is "With committed employees, we create mobility and ergonomic aids that give more in terms of function, design and quality for users of all ages."

What makes us special is our ability to make specific adaptations for everyone. We perform both simple and more advanced customizations for users. Eurovema also has a subsidiary in Norway, Eurovema Mobility AS.
