

Maku Stål AB

Maku Stål AB is one of Sweden's leading manufacturers of lattice beams. Our range also includes pipes, gangways and conveyor bridges. Our lattice beams and steel frames are designed according to EKS 10 and Eurocode 0, 1 and 3.

In our factory in Borås, Sweden, we manufacture lattice beams of high quality, high dimensional accuracy and with a very good fit. Maku Stål produces structures up to performance class EXC3.

We promise, as a certified supplier, to have proven experience, skilled staff, appropriate equipment and proper starting material to our customers.

We also aim to have quality systems that are adapted to the product and market. To give you as a customer safety and security, we work with a variety of quality controls. All our products are CE marked. Maku Stål is certified according to EN 1090-1: 2009 and A1: 2011.
