

Weland Welded Components AB

Weland Welded Components AB provides services for the complete manufacturing of industrial large sheet metal structures. Our niched total offer is unique on the Swedish market.

The production facility in Lidhult comprises 28,000 square metres of well-suited premises with equipment for handling large and heavy objects. This provides us, together with Weland AB, a unique opportunity to offer our customers complete manufacturing, even of

large sheet metal structures. Under our own management, we offer cutting, bending, welding, machining and painting.

Our ambition is to attract customers in sectors such as heavy vehicles, agricultural machinery, wind power, infrastructure and the construction industry. With all of the production under the same roof, we can offer cost-efficient and sustainable solutions, where both the customer and we are winners.
