

Gremo AB

Gremo AB is a leading manufacturer of Swedish-made forest clearing machines. Our concept is to deliver smooth and reliable forest clearing machines to suit all types of thinning and felling.

Gremo has been the market leader for many years in the 8-10 tonnes load category. Today Gremo is a well-known brand, with its elaborate, light and flexible forest clearing machines.

The machines are both environmentally friendly and provides high performance. Our strength is our technology development and our customizations.

We are constantly evolving in our segment. We optimize the machines by working closely with our customers. We strive to develop, manufacture and sell forest machines that do as little damage as possible without compromising performance.
